

Submission Summary

Conference Name

2026 IEEE 5th World Conference on Applied Intelligence and Computing

Paper ID

3608

Paper Title

Impact of Artificial Intelligence on Education in Young Adults (15–25 Years)

Abstract

In recent years, Artificial Intelligence has become a valuable educational technology that has helped young students with their education through technology. Students in the age range of 15-25 have begun using AI systems for answering questions, writing explanations, programming support, and assignments preparation. Although these technologies have helped increase accessibility and convenience in education, they may have some detrimental effects on reasoning ability and education imbalance.

This paper presents a predictive model to analyze the relationship between AI-supported learning and student performance. In this research, we will utilize the data containing 100 observations of students with features such as AI usage time, studying time, attendance percentage, previous scores, and dependency ratio. We will apply the linear regression technique to predict the current student performance based on the changing learning habits influenced by the AI technology.

We hope that our research helps quantitatively analyze the importance of AI in education and its role in becoming either an effective educational tool or a cause of dependency in young people.

Keywords: Artificial Intelligence, Education, Student Performance, Machine Learning, Academic Analytics, Linear Regression.

Submission Questions Response

1. Conflict of Interest

The authors declare no conflict of interest and all authors are aware of this submission. In case of any conflict submitting author will be responsible.

Agreement accepted

2. Status of using third-party material in your article.

Third party content is defined as any material within the manuscript which is not your original work. Third party content may consist of text passages, figures, photos, screenshots, etc. and be found in many places such as but not limited to - the Internet, print and online books and articles, theses, annual reports, conference material, photocopies, course packages, translations, visually impaired readers. In particular, pay close attention to sensitive images such as identifiable persons or human research participants, recognisable architecture, logos, brands/trademarks, and images from online photo libraries. You are responsible for clearing the rights for third party content under your publishing agreement. Please confirm if your manuscript contains any third-party content?

I am not using third-party material for which formal permission is required

3. Certificate of originality

This is to certify that my submitted research paper is an outcome of my research work. I have duly acknowledged all the sources from which the ideas and extracts have been taken. The submitted paper is free from plagiarism and has not been submitted elsewhere for publication. I am aware that the publisher/conference organizer can reject it at any publication stage if it is found to be plagiarized or machine-generated.

Agreement accepted

4. Corresponding Author's Contact number

Please provide the Contact number of the Corresponding Author, including the Country code.

7696023605

5. Country Name

Please provide the Name of the country where most authors belong.

india

6. Authors Contributions

Please specify individual authors' contributions in the research as recommended by the Committee on Publication Ethics (COPE).

(e.g. , study conception and design: Author_1, Author_2; data collection: Author_2; analysis and interpretation of results: Author_1, Author_2, Author_3; draft manuscript preparation: Author_2. Author_3. All authors reviewed the results and approved the final version of the

Emails sent.

An author name can appear multiple times, and each author name must appear at least once. For single authors, use the following wording:

The author confirms sole responsibility for the following: study conception and design, data collection, analysis and interpretation of results, and manuscript preparation.

Study conception and design: Shubham Jain, Kanika; data collection: Kanika, Shubham Jain; analysis and interpretation of results

7. Conference Rules and Guidelines

I am agree with Conference Rules and Guidelines given at
